Hotels & Public Buildings

Georgia

Rooms Hotel / Tbilisi

Located in the intellectual neighborhood of Vera, the doors of the Rooms Hotel Tbilisi are open to anyone ready to have an invaluable experience. It is so much more than a 135 guest room hotel. It is a destination of its own. Architects of this project have successfully transformed this former industrial building of an old publishing house into a contemporary 5-story hotel. Rich with character, it is designed for a flawless and comfortable stay. The neighborhood offers laid-back hangout. Authentic experiences obtained at Rooms Hotel Tbilisi cannot be recreated anywhere else.

Project description

In order to provide the guests of this 4-star upscale design hotel with the matching parking experience, the hotel is equipped with a SKIDATA parking solution. It is the first SKIDATA parking installation in Georgia, and ensures a smooth vehicle access to the underground parking of the hotel.

A top-level hotel deserves a top-level parking management system

Parking is becoming more and more of an issue in the capital of Tbilisi, as parking space is limited - especially in the city center. The Rooms Hotel provides therefore two areas of underground parking which are connected to each other and are of common usage. The first,

which is located on the -1 floor of the hotel, has 84 parking spaces. The second parking area has an additional 47 parking spaces and is located on the -1 floor of the 5* Intercontinental hotel.

With the SKIDATA solution the hotel provides comfortable and quick access for both the hotel guests, as well as visitors to the restaurant, which has become a hot spot for locals. Hotel guests and visitors to the hotel restaurant are entitled to get preferred rates for the parking facility by validating the parking ticket with the SKIDATA Validation.Cash. Others who use the parking facility have to pay the full prize.
